Surface Lease P00300	Area LB	Block 6438

Conditions of Approval:

- 1) All operations must be conducted in accordance with the OCS Lands Act (OCSLA), the lease terms and stipulations, the regulations of 30 CFR Part 250, Notices to Lessees and Operators (NTLs), the approved (revised) Application for Permit to Modify (APM/RPM), and any written instructions or orders of the District Manager.
- 2) A copy of this permit (including all attachments) must be kept on location and made available to inspectors upon request during the permitted operation.
- 3) All pressure containing equipment must be tested to the approved permitted pressure and recorded on the daily operations report. If well pressures exceed the SITP/MASP stated in the approved permit, the equipment in use must be tested at a minimum to the new observed pressure. The appropriate District must be immediately notified of this pressure change and a RPM submitted to document the change.
- 4) Notify the Permitting Section at Least 48 hours in advance of beginning these approved operations AND of any required BOP tests.
- 5) WAR reports are due no later than noon each Wednesday.

Correction Narrative

Permit Primary Type Workover Permit Subtype(s) Change Tubing Other Workover

X Proposed or Completed Work

Operation Description

Clean out and acidize wellbore with coil tubing and replace tubing/ESP.

Procedural Narrative

The A-57 production has declined, and it is believed there is a hole in the tubing.

This workover will pull the ESP, clean out the wellbore with coil tubing, acidizes with 10,000 gals of DAD acid (SB4 volume is 105,761 gals) and run new tubing and a new ESP pump.

SB4 Volume Calculation:

71.8 gals per foot over 1,473' of reservoir sand at a porosity of 26% yields an SB4 volume of 105,761 gallons.

Job design calls for 10,000 gals of DAD Acid.

Questi	Questions				
Number	Question	Response	Response Text		
A	Is H2S present in the well? If yes, then comment on the inclusion of a Contingency Plan for this operation.	NO			
В	Is this proposed operation the only lease holding activity for the subject lease? If yes, then comment.	NO			
С	Will all wells in the well bay and related production equipment be shut-in when moving on to or off of an offshore platform, or from well to well on the platform? If not, please explain.	N/A			
D	If sands are to be commingled for this completion, has approval been obtained?	N/A			
Е	Will the completed interval be within 500 feet of a block line? If yes, then comment.	NO			
F	For permanent abandonment, will casings be cut 15 feet below the mudline? If no, then comment.	N/A
